### Santo, TX – Shark Bite™ Aluminum Lower A-Arm for C2-C3 Corvettes (1963-82)

SpeedDirect is pleased to announce Shark Bite™ Aluminum Lower Control Arms for C2-C3 Corvettes (1963-82). These are the latest product in their quest to transform vintage Corvettes into modern handling machines. The new alloy control arms offer a significant reduction in un-sprung weight for the front suspension. They are designed to accept coil over shocks & springs giving owners the ability to adjust ride height, spring rate and shock response when paired with optional single or double adjustable shocks.

These rugged lower A-arms have a ridged aluminum design with PTFE-lined ball joint bearings to ensure accurate, repeatable suspension tracking throughout the entire range of travel. They are a huge improvement to the heavy, rubber bushed, stamped steel factory lower control arms they replace.

The a-arm kit comes complete and includes beefy cross shafts to virtually eliminate shaft flexing, which changes suspension geometry. U.S. made high quality precision ball joints as well as Grade 8 fasteners are also included.

#### Product Features

- Significant reduction in un-sprung weight over factory a-arms
- Precision no maintenance PTFE-lined ball joint bearings for accurate repeatable suspension tracking
- Welded / machined aerospace alloy construction
- Heavy duty steel cross shaft
- Compatible with coil over shock & spring packages
- Precision U.S. made ball joints
- Complete bolt-on kit including Grade 8 fasteners
- Available in two finishes: Natural Aluminum (SKU 780-88200) & Polished (SKU 780-88210)

#### About SpeedDirect

Pioneers in improved handling for Corvettes and Muscle Cars, SpeedDirect is the manufacturer of Steeroids™ Rack & Pinion Conversion Kits, Shark Bite™ suspension components for C2-C3 Corvettes (1963-82), as well as Vector Series™ handling components for classic Mustangs. In business since 1994, all SpeedDirect products are proudly Made in the U.S.A.
