Santo, TX – Complete Suspension Stage Kits for Classic Corvettes (1963-82)

Shark Bite™ suspension kits for 1963-82 Corvettes are now available. Designed to put fun in every corner, these kits upgrade C2-C3 Corvettes to the latest in suspension technology. Offered in four versions - Stage 1 through 4 – enabling an iconic classic to drive and handle incredibly. All versions bolt directly into place using existing mounting locations – no drilling, cutting or modification required.

The four separate Shark Bite™ suspension packages include both front coil overs and a unique rear “rocker” coil over suspension with adjustable ride height, adjustable shock valving, and a variety of spring rates. A quick release design allows for rear springs to be changed in just 20 minutes. Kits also have larger front and rear sway bars, as well as a spreader bar. Upper and lower aluminum control arms round out the top of the line kit.

These light weight a-arms lower the roll center and reduce un-sprung weight to improve cornering and response. Kits also include optional upgrades for Steroids™ rack and pinion steering conversion and Chevrolet C6 ZO6 Corvette brakes for all four wheels.

Shark Bite™ kits improve the driving experience for the full spectrum of drivers’ from street cruising to full out road racers or anywhere in between. They will transform the C2-C3 into a machine with modern performance and handling.

About SpeedDirect

Pioneers in improved handling for Corvettes and Muscle Cars, SpeedDirect is the manufacturer of Steroids™ Rack & Pinion Conversion Kits, Shark Bite™ suspension components for C2-C3 Corvettes (1963-82), as well as Vector Series™ handling components for classic Mustangs. In business since 1994, all SpeedDirect products are proudly Made in the U.S.A.
