### **Santo, TX – SpeedDirect Rod Links™ Clutch Linkage for C1 Corvettes**

SpeedDirect's Rod Links™ spherical rod end clutch linkage is now available for C1 Corvettes (1955 – 1962). This linkage replaces sloppy, worn clutch linkages with a new style, zero free play, rod end bearing linkage.

Rod Links™ are designed specifically for both street and race applications. Bearing ends offer more durable components as well as provide very smooth operation. The PTFE-lined bearings require no lubrication and are self-cleaning, so no maintenance is required.

This kit is a simple bolt-on solution including all necessary hardware to replace the upper and lower pushrods. Rod Links™ spherical rod end linkages update your Vette with better technology and a very clean look.

Ordering Information:

[7505](#) Rod Links™ Clutch Linkage for '55-62 Corvette with Stock Clutch Fork
