Ashtray Replacement Power Source For C3 Corvette (1968 - 1982)

Replace your unused or junk collecting ashtray with something useful. SpeedDirect announces a direct replacement for the 1968 - 1982 Corvette ashtray with USB power ports.

To keep your OE styling, only the tray portion is replaced, leaving the OE door intact.

The power source comes with 2 USB ports, each port with 2.1 amps output for powering and charging your devices.

Eliminates the need for cigarette lighter insert chargers that often don't perform, don't last, and look terrible.

Each power source includes the 2 port source and all required connectors to tap into your cigarette lighter's power. With this unit you will still retain use of the cigarette lighter/power.

Stop collecting spare change and pocket lint in your ashtray and put it to work doing what no one has enough of: Charging for your devices.
